Graduate Programs in Technology

Orion Technical College School of Graduate Studies, offers advanced degrees in Artificial Intelligence (M.S.), Business Analytics (M.S.), and Computer Science (M.S.). These programs are designed to help prepare students with the skills required in today's technology-driven economy. The AI program emphasizes machine learning, deep learning, natural language processing, computer vision, and ethics. The Business Analytics program helps develops expertise in data engineering, analytics, and applied machine learning. The Computer Science program helps build mastery in computer systems, algorithms, programming, and software development.

Orion's Commitment to Community

Orion Technical College proudly rolls out the welcome mat for community partners, providing broadcast centers, collaborative classrooms, and private meeting spaces that are open for reservation. Whether it's a local business hosting a quarterly or annual meeting, or a TV station hosting a segment on campus, Orion is committed to serving as a hub for innovation and connection. For over fifty years, partnerships with corporate trainers, and post-secondary institutions have played a key role in shaping our curriculum and driving alumni success, ensuring that Orion remains deeply connected to the needs of both students and the broader community.

About Orion Technical College
Founded in 1969, Orion Technical College has proudly served the Quad Cities for over 50 years, offering industry-focused education in Allied Health, Technology, and Graduate Studies. Orion is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC).
